**Location of Site or Find Spot**
1. Immediately N.of & in Rushmoor Wood, The Lee.

**Finder & Date**

**Present Location**

**Descriptions of Site or Object**

1. Grim's Ditch is faintly visible in the meadow immediately N.of Rushmoor Wood, & a stronger section remains in the wood. It is not shown on the O.S. maps.
2. On the W.side of Rushmoor Wood, between SP 89170417 & 89100392, traces of a small bank can be seen along the side of the road & on the S.side of the road where it turns through some 90° to the E.
3. Traces of a bank with ditch on E.side, c.1.75m.wide, are visible in a pasture field N.of Rushmoor Wood. On entering the wood it narrows to c.1m.or less & resembles a medieval woodland bank - which, indeed, it may have become. The bank is visible as far as the right-angle bend in the road at 8919 0396. At its N.end in the pasture field it disappears beside a pond or old quarry. The alignment & general appearance of this stretch suggests it almost certainly is part of Grim's Ditch.
