**Descriptions of Site or Object**

1. Grim's Ditch runs through Oaken Grove, where the rampart is 6ft above the bottom of the ditch, which is 38ft wide. The course of the ditch can be faintly seen in the field on the S.W.

2. Well-preserved length of bank & ditch in woodland. **Scheduled Ancient Monument no. 83 (bucks). 35341**

3. Well preserved section of earthwork with ditch on S.E. side of the bank. From SP 898070 the line of the earthwork can be seen as it continues S.W. to 897069 as a faint mark across a field.

4. The scheduled stretch of Grim's Ditch through Oaken Grove is now very prominent due to the felling of all the trees here. S.W. of Oaken Grove the continuation of the Ditch is too faint to be recorded until Baldwin's Wood (Q.V.CAS 0140:13).
