1. Grim's Ditch appears in a pasture field S.W. of Lane's End.

2. From Lanes End, SP 904075, the earthwork continues to run S.W. & can be seen as a bank alongside a garden & as the boundary to a property as far as 903074. From this latter point to the road at Oakengrove, at SP 900072 evidence of the earthwork can be seen as a small ridge visible in a field.

3. Apart from a short stretch adjacent to the road at Lanes End (q.v. CAS 0140:16) Grim's Ditch is not properly visible until SP 9030 0746 from where it is visible as a slight ridge running across the field & parallel to the Lanes End/Oakengrove road until 9011 0727 where it has been obliterated by a pond or quarrying. This stretch is best observed from the good section of Grim's Ditch across the road at Oakengrove (CAS 0140:14). At time of visit during a period of drought the ridge showed up well, the grass on it being rather browner than the rest of the field. Conversely the ditch, on S.E. side of the bank showed up greener. The bank in this stretch is c.1.5m. wide & not more than 0.25m. high.

Scheduled Ancient Monument no. 35342.
