Present Location

Descriptions of Site or Object
1. Grim's Ditch: slight track in field boundary between Lane's End & Layland's Farm.
2. From Leylands Farm the line of the earthwork continues to run S.W. towards Lanes End at SP 904075. Probable remnants of the earthwork are visible as a slightly embanked hedgerow & field border with a very slight depression along S.E. side of the bank which may suggest the remains of the ditch.
3. This stretch survives as a sort of terrace on a field boundary, accentuating the different levels of the fields each side of it. The ditch can be seen to have been on the S.E. side of the bank. Towards Leylands Farm at c.SP 9070 0784 this difference in levels is reduced & the line of Grim's Ditch continues as little more than a field boundary from this point to Leylands Farm.

Scheduled Ancient Monument no. 35343
